

## Visitors at Seva

On Friday 8<sup>th</sup> June, children from year 6 and reception from the Sacred Hearts School came to visit Seva School to learn more about the Sikh faith.

Staff members at Seva School had put together a really fun itinerary for their visit. First they discovered the Divan hall and were taught how to do kirtan followed by an assembly by Bhai Mandeep Singh from basics of Sikhi. After this, the children were taken to the hall for langar which was served by our year 6 children. To top it off, all of the children went outside to play fun games such as boxing in the sports court and by the looks of it they really enjoyed themselves. I hope they found the Sikh faith interesting and will come back next year.

## Active Planets

Year 4 have been learning about active planets this term. We've found out some really cool information about volcanoes and whether they are active or dormant. They are very interesting and the lava looks really hot, sometimes it can reach temperatures of 700°C-1200°C!

Fun Facts:

- The biggest volcano eruption ever recorded by humans was the explosion of Mount Tambora, Indonesia in 1815.
- It ranked a 7 (or super colossal) on the volcanic explosivity index, the second highest rating in the index.
- The ring of fire is located in the Pacific Ocean.

We can't wait to find out some more interesting facts!

you think...**

Let the councillors know what you think about the 'Children's Voice' Newsletter and if you have any ideas for the next edition

## Who is Darshan???

Darshan is our class pet, he is a tiny pet tortoise that is residing in class 3KB. Mr Singh kindly brought this lovely pet to our school and to decide upon his name we took a hukamnama. We feed Darshan a vegetarian diet of lettuce, tomatoes and cucumber. He seems to love tomatoes the best.

Even though Darshan is so small, he is actually 2 years old. The children in class 3KB get to bath him every week on a Thursday. Darshan is very lucky as he doesn't stay in one place for too long, he gets to visit every classroom so all the children can take turns to take care of him. We love having him as our class pet!

## In Art we...

This term in art we have been learning about different plants and flowers. Some of the interesting flowers we have talked about can actually catch different types of flies for its dinner. Plants come in all different shapes and sizes, we have curvy plants, straight plants and even bendy plants. Some plants even have prickles on them so be careful not to touch them!

We have been drawing lots of different types of flowers, this has been really fun but also tricky as there's so much detail. Plants aren't just one colour, it has lots of different shades from dark to light so it was interesting using a variety of paint to mix different colours together.

## Year 5 Trip

In year 5, something special is happening, we are all going on a residential trip to Kingswood. Some of us are hoping to take part in some rock-climbing, archery, canoeing, leap of faith and much more! This trip will help everyone get involved and work as a team. We hope everybody will have lots of fun and go on many amazing adventures.
