

Curriculum map for Design Technology

The Design Technology curriculum for the secondary phase is built around a rotation of DT subjects to include Art and Food Technology. It is hope that the as the term proceeds we may be able to extend this to include 'Textiles' but at the moment this is still in the planning stages.

All secondary students in KS3 are given an opportunity to develop their skills, knowledge and understanding of Art, Food and the technologies related to these areas.

For more details of the curriculum for these individual subjects please click on the 'Food Technology' and 'Art and Design' links on our website.
