

# Multiplication Routeway

Written Methods		Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ( $\times$ ), division ( $\div$ ) and equals (=) signs	Write and calculate mathematical statements for $\times$ using the $\times$ tables they know progressing to formal written methods.	Multiply two-digit and three-digit numbers by a one-digit number using formal written layout (including decimals for money and measures)	Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication																						
<p><b>Developing conceptual understanding</b></p>	<p>2 frogs on each lily pad.</p>     	<p>5 frogs on each lily pad <math>5 \times 3 = 15</math></p>   <p><math>5 \times 2 = 2 \times 5</math></p>  <p>Build tables on counting stick</p>  <p>Link to repeated addition</p> 	<p>If I know <math>10 \times 8 = 80</math> then ...</p>  <p>So <math>13 \times 4 = 10 \times 4 + 3 \times 4</math></p>   <p>Build tables on counting stick</p>   	<p><math>43 \times 6</math> by partitioning</p> <table border="1" data-bbox="1209 327 1422 422"> <tr> <td><math>\times</math></td> <td>40</td> <td>3</td> </tr> <tr> <td>6</td> <td>240</td> <td>18</td> </tr> </table> <p><math>43 \times 6</math></p> <p><math>40 \times 6 = 240</math> <math>3 \times 6 = 18</math> <math>43 \times 6 = 258</math></p> <p>If I know <math>4 \times 6 = 24</math> the <math>40 \times 60</math> is ten times bigger. 13</p> <p><math>\times 16</math> by partitioning</p>  <p><math>100 + 30 + 60 + 18 = 208</math></p>	$\times$	40	3	6	240	18	<p>Grid method linked to formal written method</p> <table border="1" data-bbox="1545 343 1803 438"> <tr> <td><math>\times</math></td> <td>200</td> <td>40</td> <td>3</td> <td></td> </tr> <tr> <td>30</td> <td>6000</td> <td>1200</td> <td>90</td> <td>= 7290</td> </tr> <tr> <td>6</td> <td>1200</td> <td>240</td> <td>18</td> <td>= 1458 + 8748</td> </tr> </table> <p>If I know <math>4 \times 6</math> then <math>0.4 \times 6</math> is ten times smaller <math>0.4 \times 0.6</math> is ten times smaller again.</p> 	$\times$	200	40	3		30	6000	1200	90	= 7290	6	1200	240	18	= 1458 + 8748	<p>5172 <math>\times 38</math> 41376 + 155160 <u>196536</u></p> <p>1</p> <p>2 151 5172 <math>\times 38</math> 41376 + 155160 <u>196536</u></p> <p>1</p> <p>5172 <math>\times 38</math> 41376 + 155160 <u>196536</u></p> <p>1</p> <p>Solve Multiplication and multi-step problems in contexts, deciding which operations and methods to use and why.</p> <p>Examples:</p> <p>There is space in the car park for 17 rows of 32 cars. How many cars can park?</p> <p>What is the total mass of 235 screws each weighing 6 grams?</p> <p>Find the area of a swimming pool which is 25m long and 7.5m wide.</p>
$\times$	40	3																									
6	240	18																									
$\times$	200	40	3																								
30	6000	1200	90	= 7290																							
6	1200	240	18	= 1458 + 8748																							
<p><b>With jottings ... or in your head ....</b></p>	<p>Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher</p>	<p>Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot. Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts</p>	<p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental methods</p>	<p>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers. Recognise and use factor pairs and commutativity in mental calculations</p>	<p>Multiply and divide numbers mentally drawing upon known facts. Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000. Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers establish whether a number up to 100 is prime</p>																						
<p><b>Just know it!</b></p>	<p>Count in multiples of twos, fives and tens</p>	<p>Recall and use <math>\times</math> and <math>\div</math> facts for the 2, 5 and 10 <math>\times</math> tables, including recognising odd and even numbers.</p>	<p>Recall and use <math>\times</math> and <math>\div</math> facts for the 3, 4 and 8 times tables.</p>	<p>Recall <math>\times</math> and <math>\div</math> facts for <math>\times</math> tables up to 12 <math>\times</math> 12.</p>	<p>Recall prime numbers up to 19 know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. Recognise and use square numbers and cube numbers, and the notation for squared (<math>^2</math>) and cubed</p>
